Key Presentations

New Directions in Agriculture – Sense Making in the 21st Century

Keynote Address, Michael Thiele

Michael Thiele was born and raised on a mixed farm at Dauphin, Manitoba. He continued his agricultural education with a degree in plant science from the University of Manitoba. Over the past 30+ years, he has worked in conservation and agriculture with a focus on resource management – soil, water and wildlife habitat. Michael and Gabe Brown have co-presented at numerous Canadian conferences and both are involved with the Soil Health Academy (<https://soilhealthacademy.org/manitoba>). Michael also works closely with producers to regenerate soils, increase profitability and grow good food. He lives in Shoal Lake, Manitoba with his wife Joanne.

Keynote Speaker Sponsored by OSCIA

Introduction to Agri-Tourism Workshop

This three-hour customized workshop led by Kim Clarke, Tourism Experience Development Specialist (RT07), will introduce you to experience development and how it can benefit your farm business and local communities. Learn about the progression of economic value, the steps in experience development, and how others are using experiences to add value to their businesses. You'll also start to shape your own idea. If you are looking to make the shift into agritourism or are wondering how to enhance products or experiences you already offer at your farm this is a workshop opportunity not to be missed. NOTE Workshop starts at 9AM.

Pre-registering online strongly recommended as space is limited to 24.

41st Annual Central Ontario Agricultural Conference - Friday February 28, 2020

For speaker information, bios and full concurrent session descriptions visit
www.CentralOntarioAgConference.ca

1 Ruth Knight, P.Ag. CCA-ON Organic Consultant Inc.

Explore the Health of the Soil on Your Farm
Ruth will cover key parameters, assessment tools & methods you can use on your farm to make sound management decisions based on the health of your farm's soil.

2 Michael Swidersky, Grey Dufferin Community Pasture

My Experience as a Large Flock Operator & With Community Pasturing
Based on his own experience as a member of the Large Flock Operators, Mike will present on his operation and the use of pasture. He'll also provide an overview of the Grey Dufferin Community Pasture and its grass management.

3 Jeff Davis, FCC Ag Transition Specialist

Taking control of your farm's transition
Drawing on his long career of providing farm transition advice to family businesses, Jeff will give practical advice, tips and guidance to get your farm business on the right path.

Speaker Sponsored by 

4 Steve Kell

Annual Crop Farming Forecast

Steve will once again provide his predictions for this year's feed and grain markets and what the future has in store.

5 Gerald Poechman, Poechman Family Farm, Walkerton, ON

Organic Egg Laying

Presentation will focus on modern egg laying production utilizing sprouts as part of the feeding program. There will also be attention drawn to the potential of small scale organic producers selling into larger organic pool.

6 Jen Birchmore, Senior Geographical Information Specialist, OMAFRA

AgMaps

OMAFRA's Agricultural Information Atlas is an interactive online application that allows you to create custom maps and find agricultural information for Ontario right down to your own

farm. It combines agricultural data on soils and drainage, as well as data layers from other Government of Ontario ministries.

7 Jillian Craig, Small Ruminant Specialist, OMAFRA

Raven Predation Project

If you are experiencing raven predation hear results from a province-wide survey and about next steps of conducting on-farm trials.

8 Kirsty Stevenson, KIRSTO

Social Media & Your Farm

Attend this session to learn about how and why social media is important to promoting your farm & agri-food business. Also get helpful hints in generating content and consumer interest.

Speaker Sponsored by

9 John Molenhuis, Business Analysis & Cost of Production Specialist, OMAFRA

Financial Planning for the Ontario Sheep Industry

10 Michael Thiele, Michael Thiele Consulting & Soil Health Academy

Rebuilding Fertility in Degraded Soils

Michael will talk about the activities that have brought about the degradation of our soils but then elaborate on measures we can take to reverse this process with a focus on soil life and Regenerative Agriculture.

11 Brian DeJong & Alex Heroux, Youngfield Farms Ltd., Nestleton, ON

Making Great Careers in Crop Farming!

This multigenerational farm team will provide insights from their own experience in agriculture practices, value added diversification, and family dynamics that are driving success in their family farm business.

Dairy program available on the website

CEU credits for CCAs will be offered
